# Richard Knoche

## Personal Information

Address: 8810 62nd Ave, Berwyn Heights, Maryland 20740
Phone: (703)-801-4456
email: raknoche@gmail.com

## Experience

**Aug 2011 - Present** | Ph.D. Candidate at The University of Maryland
*The LUX Dark Matter Detector*

- Worked with international collaboration to produce the world's most sensitive WIMP-nucleon scattering cross section limits.
- Developed ground breaking techniques that produced the world's most precise electron recoil calibration in a liquid xenon TPC.
- Developed novel techniques to produce 3D position dependent signal corrections in a spatially and time dependent electric field.
- Calibrated the detector's combined energy model.
- Built on-site gas sampling system for real-time monitoring of xenon impurities at the part-per-trillion level.
- Automated the extraction of hundreds of data features from calibration data.
- Directed on-site detector operations as Deputy Science Coordination Manager.

**June-Sep 2010** | Research Assistant at Goddard Space Flight Center
*SWIFT Gamma-Ray Burst Mission*

- Analyzed data from Swift Burst Alert Telescope (BAT) to search for hard X-ray emissions around the on-set time of supernovae.
- Quantified the X-ray counterpart to Fermi-LAT pulsar observations using X-ray emission data from the Chandra and BeppoSax missions.

**Aug 2008 - May 2011** | Research Assistant at James Madison University
*Department of Physics and Astronomy*

- Designed and maintained table-top experiments to characterize the complex, non-linear behavior of granular systems.
- Implemented computer vision techniques to quantitatively characterize particle movement in a two dimensional shear flow.
- Utilized optical polarization techniques to quantify stress networks in granular systems.
- Performed statistical analysis to characterize relevant parameters in a two dimensional granular shear flow.

## Education

**Expected 2016** | Doctor of Philosophy (Ph.D.) in Physics, **University of Maryland**
Thesis: "Signal Corrections and Calibrations in the LUX Dark Matter Detector"

**May 2011** | Bachelor of Science (B.S.) in Physics, magna cum laude, **James Madison University**
